

AMP PASTE

Supports the energy metabolism

Characteristics

Complementary feed for horses, ponies and camels.
Prequine AMP Paste contains Adenosine 5-Monophosphate (AMP), which has a good influence on the blood circulation. This increases oxygen and essential nutrient supply and supports removal of metabolic waste products such as lactic acid, delaying fatigue.
Prequine AMP Paste also contains L-carnitine L-tartrate, required for oxidation of long-chain fatty acids for energy production.

Directions for use

Horses/Camels: 1 injector (50 g) given orally 1 day before competing/intensive training session.
Repeat 4-6 hours before competing/intensive training session.
Ponies: Half of the above-mentioned quantities.

Storage

Store dark and dry at 15-25°C.
Keep out of sight and reach of children.

Presentation

50 g oral injector.

Shelf life

3 years from manufacturing date (MFD).

Composition

Contains per 50 g:

Propylene glycol, Adenosine 5-Monophosphate (AMP) 2.069 mg, Sodium benzoate, Glycerine.

Feed additives per 50 g:

Amino acids: 3c301, DL-methionine, technically pure, 517 mg; 3c322, L-lysine monohydrochloride, technically pure, 431mg; 3c370, L-valine, 345 mg; 3c362, L-arginine, 862 mg.

Vitamins: 3a835, Vitamin B12, 172 µg; 3a826, Vitamin B2, 9 mg; 3a910, L-carnitine L-tartrate (LCLT), 3.448 mg.

Flavouring: 2b17005, L-Aspartic acid, 345 mg; 2b17034, Glycine, 862 mg.
