

BRASS GOLD

Supporting bone and cartilage development

Characteristics

Complementary feed for horses and ponies.

Prequine Brass Gold is produced according to GMP+ FSA quality guidelines. Prequine Brass Gold is developed to support the pregnant/lactating mare, and the bone and cartilage development in the young horse by the supplementation of amongst others phosphorus, calcium, copper, zinc, manganese, several vitamins, glucosamine, methylsulphonylmethane (MSM), lithothamnion and chondroitin. The right balance between calcium and digestible phosphorus in young animals is crucial for their bone development, which is exactly why Prequine Brass Gold is developed with this correct ratio for young animals in mind. Zinc, copper and manganese are trace elements that also play an important role in the bone development and formation as they, amongst others, activate enzymes involved and assist in mineralization. For this reason, all three trace minerals have been added in the high bio-available chelated form. Vitamins A, K3 and niacinamide (vit B3) play a supporting role in the bone turnover and the bone mineralization. Vitamin D3 on the other hand plays a supporting role in the absorption of both calcium and phosphorus. MSM is a natural compound that is important to help in the formation of connective tissue, including bone and cartilage. Chondroitine -, and glucosamine sulphate are both important active ingredients in aiding with the formation and maintenance of cartilage. Lastly, lithothamnion is a type of red algae that is rich in highly available calcium and trace elements that are important for bone development and has shown to support bone development when supplemented at a young age.

Directions for use

For mares in the last 3 months of gestation, foals and weanlings. Mix with feed.

Pregnant mares: 1 x 60 g per day.

Lactating mares: 1 x 60 g per day.

Foals aged 6-12 weeks: 1 x 10 g per day.

Foals aged 12-24 weeks: 1 x 15 g per day.

Weanlings: 1 x 30 g per day.

Ponies < 300 kg

and their foals: Half of the above quantities.

Storage

Store dark and dry at 15-25°C. Close packaging after each use. Keep out of sight and reach of children.

Composition

Contains:

Monocalcium phosphate, Calcium carbonate, Glucosamine, Methyl sulphonyl methane, Dextrose, Lithothamnion, Magnesium oxide, Chondroitin sulphate.

Feed additives per kg:

Vitamins: 3a672a, Vitamin A, 550.000 IU; 3a671, Vitamin D3, 70.000 IU; 3a711, Vitamin K3, 150,0 mg; 3a315, Niacinamide, 108,1 mg.

Trace elements: 3b606, Zinc, from Zinc chelate of amino acids hydrate, 6,0 g; 3b406, Copper, from Copper (II) chelate of amino acids hydrate, 1,5 g; 3b504, Manganese, from Manganese chelate of amino acids hydrate, 4,0 g.

Presentation

Bucket à 2 kg.

Bucket à 4 kg

Shelf life

3 years from manufacturing (MFD).
