

LINSEED OIL

A plant-based source of Omega-3

Characteristics

Feed material for horses, ponies and camels.

Prequine Linseed Oil contains a 100% crude linseed oil, obtained from the first cold press.

Linseed oil is a great plant-based source of omega-3 fatty acids, which support a glossier coat and healthy skin. Linseed oil is an energy dense product that is given as a slow release of energy, thereby keeping horses calmer compared to feeding purely carbohydrate energy sources.

Domesticated horses and camels are often fed concentrated sources of energy in the form of grains either in pure form or in pellets.

Grains possess more omega-6 fatty acids than forage, creating an imbalance of omega-3 to omega-6 fatty acids. As linseed oil is more than three times higher in omega-3 than in omega-6, supplementing linseed oil helps improve the omega-3 and omega-6 ratio in the diets.

Directions for use

Mix with feed.

Horses/camels:

Start with 30ml per day, which can gradually be increased to 75ml per day when needed.

Ponies:

Half of the above-mentioned quantities.

Storage

Store dark and dry at 15-25°C. Protect from light.

Close packaging after each use.

Keep out of sight and reach of children.

Presentation

Bottle à 1 L.

Jerry can à 2,5 L.

Jerry can à 5 L.

Jerry can à 20 L.

Shelf life

See expiration date, after opening 3 months.

Composition

Contains:

Crude linseed oil (100%).
