

MSM

Feed material for horses and ponies

Characteristics

Methylsulfonylmethane, better known as MSM, is a naturally occurring sulphur compound with well-known antioxidant properties. A variety of health-specific issues are improved with MSM supplementation, including protection of the body cells and support of quick recovery after training or sport performances. MSM also serves as nutritional support for a good quality of coat and hoofs.

Composition

Contains: Methylsulfonylmethane.

Analytical constituents:

Sulphur 26 %

Directions for use

Mix with feed

Horses: 2 x 10 g per day.

Horses in training, sport: 2 x 10-15 g per day.

Foals and ponies: 2 x 5-8 g per day.

Storage

Store dark and dry at 15-25°C. Close packaging after each use. Keep out of sight and reach of children.

Presentation

Jar à 1.000 g.
